PROFESSIONAL PROFILE

- Data Scientist and AI Engineer with an MS in Data Science and a BS in Computer Science. More than five years of experience in full-stack web development, software engineering, Data Science, AI, Machine Learning, Deep Learning, NLP, data analytics, databases, and teaching.

CORE EXPERTISE

- Data Science, statistical analysis, data cleaning, visualization, feature engineering, predictive modelling and model evaluation.
- Machine Learning, Deep Learning, NLP, text classification, dataset construction, annotation, fine-tuning and model integration.
- Python, Django, REST APIs, React, JavaScript, TypeScript, PostgreSQL, MySQL, SQL Server, SQLite, Docker and GitHub.

PROFESSIONAL ROLES

- Computer Science Lecturer at Khurasan University, Afghanistan.
- Founder of Saif Tech Studio: software, web, AI, ML, NLP and business automation solutions.
- Founder and instructor at Saif Online Academy: practical technology education and mentorship.

SELECTED PROJECTS AND RESEARCH

- AfghanLink Digital Ecosystem: multilingual platform with 10+ integrated service portals.
- Raise Solar Company Management System: offline customer, invoice, expense, installer, refund and reporting software.
- Multi-Source Pashto News Dataset for Text Classification: corpus construction, annotation, NLP preprocessing and benchmark evaluation.
- Low-resource Pashto and Dari datasets, NLP model training and AI-powered education research.

EDUCATION

- Master of Science in Data Science.
- Bachelor of Science in Computer Science.
